Website Setup (if we are handling your website hosting)

Excalibur provides many hosting plans. The Standard plan provides website hosting and 5 e-mail accounts. The Enhanced plan provides website hosting, 10 e-mail accounts, and automatic statistic reports on your site's traffic. Reports are generated weekly on how many visitors your website has received, where they came from, how long they spent, what pages were the most popular, etc. These statistic reports are extremely valuable in determining the effectiveness of your website. Sample reports are available upon request. Additional email accounts can be added to any package at \$1.50 additional for each account per month and can be added at any time. All email passed through our servers are filtered through 3 levels of virus protection and 12 layers of SPAM filtering. This eliminates 99.9% of all incoming and outgoing viruses that are attached to email and about 90% all incoming SPAM. Please call our office or visit our website at www.excaltech.com for more details on each package.

Please Select Your Hosting Package:

- Standard Enhanced Enterprise
 Email Only Enhanced + SQL Enterprise + SQL

Database(s) Required:

- None Access MS SQL MySQL

Excalibur gives you the ability to log into our servers and modify your website content free of charge. We can set your account up with either FTP or FrontPage access.

Please Select Your Access Type:

- FTP FrontPage Don't know / None

Do you currently have a website? Yes No

Fill out the following section only if you currently have a website and you need Excalibur to transfer your website content to our server.

Your current website host should have given you the information necessary to access all of your website files and to transfer them. If you do not know the following four items, you will need to contact your current host to obtain this information.

Current Website Host Information

Server Name _____

Server Type FTP FrontPage Don't know

Username _____

Password _____

Domain Registrar Information

Every domain name must have a registrar AND a host. Registrars generally offer free domain parking until a website and/or email accounts are established. These then must be housed on a server by a web hosting provider. The domain registrar is the company that your domain name was purchased through. Contrary to popular belief, domain names are not actually purchased and can only actually be "rented" for specific periods of time, at the end of which, the domain will have to be renewed through the registrar or it will be released for repurchase. Registrars keep track of what servers to point the domain to to look for the information associated with that domain. In order to setup a domain on our servers, we will need to log into your registrar and change the name servers to point to ours. Please provide the necessary information below. If you have questions regarding your registrar, please feel free to call our office.

Registrar _____

Username _____

Password _____

Notes

Please specify any special instructions or notes below.

Excalibur Technology - Hosting Transfer Questionnaire

Billing

Please bill my e-mail/hosting service to: (if different from your main address)

**Your account will become active and billable once the transfer to our server is complete. Excalibur will bill you on a quarterly basis. One year prepayment includes one free month of hosting.*

Important Final Information

Please note that you must contact your old host provider to cancel any previous hosting accounts with them. Excalibur will notify you when the transfer is complete so that you can cancel your previous service.
